

Peter Bartoli

Director of IT, Raytheon / Photon Research Associates
Adjunct Lecturer, San Diego State University, Computer Science

Peter Bartoli is an entrepreneur, leader, teacher, and keynote speaker in the areas of business, information technology, information management, and computer security. He currently serves as the Director of IT for Photon Research Associates, a subsidiary of Raytheon, and as an adjunct lecturer in San Diego State University's Computer Science department, where he teaches the upper-division and graduate-level computer security curriculum.

Prior to Photon Research, he founded the security consulting firm Consolvant in 2002, and led it to \$1M in annual revenue and through its sale to a San Diego-based technology outsourcing company which took its name. Before Consolvant, he was the Technical Director of the Security Analysis Division of SAIC's Secure Business Solutions Group (SBSG), where he developed the line of business, methodology, and the internal training program used by 150 engineers worldwide to analyze organizational, physical, and technical data security at SAIC's customers. Also at SAIC, he was the head developer and software architect for the Department of Defense's Public Key Infrastructure (PKI) leading up to its first deployment, and a key piece of SBSG's capability growth from a \$1M business in 1997 to \$60M in annual revenue in the year 2000.

Peter Bartoli

Director of IT, Raytheon / Photon Research Associates
Adjunct Lecturer, San Diego State University, Computer Science

His diverse experience over the last fifteen years includes startup incubation, due diligence, mergers and acquisitions, integration of acquisitions, information governance, product development, wide-area high-availability network and systems design and architecture, training and curriculum development, technical writing, sales, and marketing. He has extensive experience in digital forensics and performing and demonstrating attack and penetration techniques in over one hundred penetration tests, audit, and product security reviews to identify and help mitigate system security vulnerabilities. Industry experience includes work with energy and utility companies, health care providers, automobile manufacturers, internet service providers, embedded device manufacturers, retail chains, mass media outlets, government entities, and the United Nations.

Peter Bartoli

Director of IT, Raytheon / Photon Research Associates
Adjunct Lecturer, San Diego State University, Computer Science

He has been noted as a subject matter expert in periodicals, magazines, and television news, served as an expert witness in cases pertinent to computer intrusions and intellectual property in the federal court system, and has served on the Board of Advisors to Brownstone Publishers, a leading provider of information governance journals.

Mr. Bartoli is a graduate of San Diego State University with a B.S. in Computer Science.
